

GROW PROFITS!

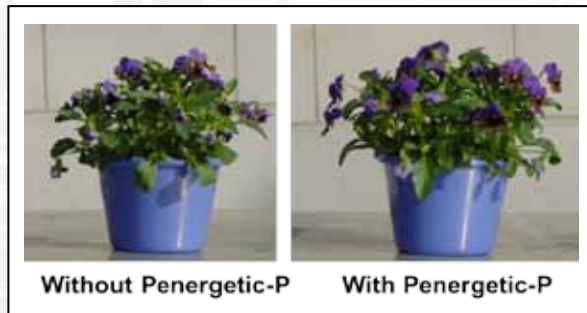

- Improve nutrient availability
- Increase stress resistance
- Optimize fruit, flower & leaf
- Enhance quality
- Reduce chemicals
- Grow income & profitability

For Soil

Penergetic k used as a soil amendment enhances soil fertility, activates soil microorganisms and increases plant availability of soil-borne (or applied) nutrients. Also use penergetic k to create better composting faster (refer to Penergetic Composting flyer for details).

Application rate: 1 oz. per cu. yd., mixed with or sprayed on soil mixture.

For Plants

Penergetic p for plants may be applied as a foliar (spray) application, via drip lines or through fertigation in soil-based or hydroponic settings.

Products: penergetic p F molasses (water soluble)* or penergetic p ULTRA (wetable powder).

* Molasses form best for hydroponics, drip lines and fertigation.

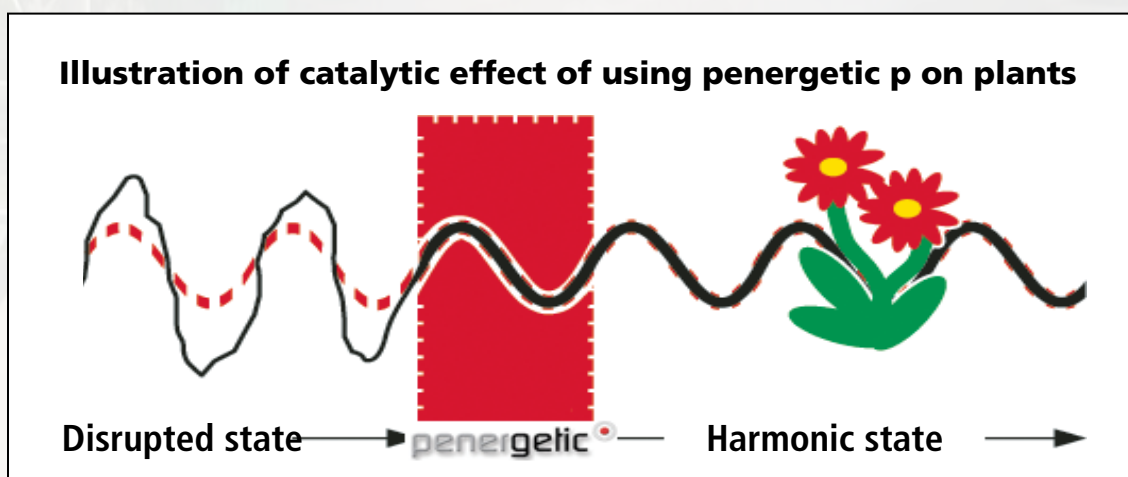

Inclusion rate: 6.7 oz. / 100 gallons water weekly.

** Penergetic p (either form) may also be used as a seed treatment.

Supplementary Recommendation:

Install AquaKat on water line or in water tank. Alternatively, use penergetic w (5.3 oz./1000 gal. water) to control biofilm & algae in watering system.
