the natural biotechnology

Optimal Liquid Swine Manure Treatment

penergetic  **g**

- Reduces odors (in-barn, in lagoon, when agitating & on fields)
- Makes manure more homogenous - so easier to pump out pits
- Overcomes sludge build-up and crusting
- Retains nitrogen by converting ammonia to ammonium
- Eliminates problem of foaming, including when pumping out
- Prevents plant scorching & minimizes groundwater pollution

Applications:

- slurry tanks and lagoons
- underground storage pits
- through slatted floors in barns

penergetic^g

Slurry Activator

“Converting a problematic waste product into a valuable organic fertilizer.”

- **Economical**
- **Easy to Use**
- **Effective**
- **European technology**

Illustrations 1 - 4 show the homogenizing effect of penergetic g on liquid manure.

[Note: the “g” in Penergetic g stands for “gülle”, which is the German word for slurry/liquid manure.]

DDGs causing carpeting or foaming problems in your deep pits?

Use “specially formulated” penergetic g(k) or g(k)(f) (for pig slurry) to address these issues.

Penergetic Solutions offers a full range of products for swine operations, for other livestock and poultry, sustainable crop production and water vitalization.

penergetic^t - for feed

penergetic^k - for solid/dry manure, compost and soil

penergetic^p - for plants (field crops)

AQUAKAT - for water quality and vitalization
