

Trial: Potatoes (Idaho)

Variety: Norwegian Yellow (fingerling) potatoes **Trial Size:** 2 X 20 acres (2 X 8.0 ha)

Protocol: Control: Growers Standard Practice (GSP)

Penergetic: GSP + Penergetic k [10.5 oz./ac (750 g/ha)] + Penergetic p [two applications at 3.5 oz./ac. (250 g/ha)]

Results: Penergetic: 16,683 lbs./ac (18,958 kg/ha)

Control: 13,431 lbs./ac (15,263 kg/ha)

Difference: 3,252 lbs./ac (3,695 kg/ha)

**** Penergetic Treated = 24.2% more production. ****

Note: Idaho & Washington States = 50% of \$4.0 billion US potato production.
