

SOYBEANS

Del Rapids, South Dakota (July 2016)

Control: Growers Standard Practice (GSP)

Penergetic Treated: GSP + Penergetic k (soil activator) 7.0 oz./acre with burnoff + Penergetic p (in crop foliar) 3.5 oz./acre applied in crop with herbicide

PRODUCER OBSERVATIONS: evidence of more extensive nodulation on roots of Penergetic treated plants. Harvest (yield) details expected in about six weeks.
